Hi Martin

Leaving for today, but wanted to let you know that validation was received today (attached).

Would like to talk to you re pilot study-amendments, rationale behind them and if we really need them.

Regards,
Anina

No problem - it will be July 8, 9, and 10 as planned.

*Thank you,
Annette Baird*

Hi Annette,

due to my travel I may respond only today.
July 1-3 would not be my preference.

Regards,

Martin

Hi, Everyone,

Currently, the Risk Claims Meeting is scheduled for July 8, 9, and 10 in Williamsburg. Would you be available for this meeting July 1, 2, and 3?

Please let me know your availability as soon as possible.

*Thank you,
Annette Baird

Thank you very much Ted,

sorry for my late response, however I was traveling for some time.

Of course, I would appreciate a copy of this article and to quite some extent, I am very balanced and stable. So, please go ahead!

Sincerely,

Martin

Dear Martin,

You might find it interesting to get hold of the following article: Bunker, S. J., et al., " 'Stress' and coronary heart disease: psychosocial risk factors. National Heart Foundation of Australia position statement update," MJA, 178: 272-276, 2003. I assume that MJA stands for the Medical Journal of Australia. Let me know if you need me to send you a copy of this. This, of course, may complicate your life.

Best regards.

Ted

Subject: FW: Seminar-5/22 Professor Bonner Denton

On Thursday May 22 at 10 am in the RD&E Lecture Hall, Professor M. Bonner Denton, Dept of Chemistry U. of Arizona will discuss his work developing improved ion detectors for mass spectrometry. Recent results using a micro-Faraday array detector indicate a detection limit of 100 ions and a linear dynamic range over five orders of magnitude. Further enhancements, such as specialized charge read out modes, could theoretically both lower the detection limit by a factor of seven and increase the linear dynamic range to nine orders of magnitude.

Professor Denton is also Chair-Elect of the Analytical Division of the American Chemical Society
